Summary

Second-year Information Technology student passionate about backend development and Java. Experienced in building full-stack projects using Spring Boot and PostgreSQL with a growing understanding of REST APIs, authentication, and database design. Currently strengthening object-oriented programming, data structures, algorithms, and system design fundamentals.

Technical Skills

Programming Languages: Java, SQL
Backend: Spring Boot, REST APIs, JWT Authentication
Database: PostgreSQL, Appwrite
Frontend: React, HTML, CSS, Tailwind CSS
Tools: Git, GitHub, Postman

Projects

AetherVault | *Spring Boot, PostgreSQL, React*

2026

- Built a password manager that encrypts passwords on the client before storing them in the database.
- Implemented secure user authentication using JWT and Google Sign-In.
- Designed REST APIs for managing encrypted credentials and user accounts.

Waste2Worth | *Spring Boot, PostgreSQL*

2026

- Developed a waste pickup management platform where users can schedule pickups and earn reward points.
- Built REST APIs using Spring Boot and secured user authentication with JWT.
- Designed the PostgreSQL database for users, pickups, waste categories, and rewards.

RotoGuard | *Spring Boot, WebSockets, PostgreSQL*

2026

- Built an IoT monitoring dashboard for tracking machine temperature and vibration in real time.
- Implemented WebSocket communication for live telemetry updates between backend and frontend.
- Developed dashboards to visualize machine status and historical sensor data.

Experience / Extracurricular

Hackathon Participant

Kolkata, India

RotoGuard Development Team

2026

- Worked on backend development for the RotoGuard hackathon project.
- Collaborated with teammates to build the MVP within the hackathon timeline.
- Selected among the Top 48 teams from over 200 participating teams.

Education

Narula Institute of Technology

Kolkata, India

Bachelor of Technology in Information Technology

2023 – 2027

Saint Paul's School (CISCE)

Higher Secondary Education
