Summary

Second-year Information Technology student with a strong foundation in backend development, secure system design, and database architecture. Experienced in building scalable, secure full-stack applications using Spring Boot and React. Proficient in REST APIs, zero-knowledge architecture, and system design fundamentals, with consistent practice in data structures and algorithms.

Technical Skills

Programming Languages: Java, C, JavaScript, SQL

Backend & Security: Spring Boot, Spring Security, OAuth2, REST APIs, JWT Authentication, JDBC,

Database & ORM: PostgreSQL, MySQL, Appwrite, JPA

Frontend: React, Tailwind CSS, Framer Motion, HTML, CSS

Networking & Tools: OSI Model, TCP/IP, Git, GitHub, Postman, LaTeX

Projects

AetherVault | *React, Spring Boot, PostgreSQL, Tailwind, Framer Motion*

2026

- Engineered a highly secure, zero-knowledge password manager utilizing client-side AES-256 encryption, ensuring the backend only stores unreadable ciphertext blobs.
- Implemented a dual-authentication gateway integrating custom JWT-based manual login and Google OAuth2 via Spring Security.
- Designed a dynamic, glassmorphic command-center UI with complex conditional routing and interactive animations using Framer Motion.

Waste2Worth | *React, Spring Boot, PostgreSQL, JWT*

2026

- Built a full-stack waste management platform enabling users to schedule waste pickups and earn rewards via affiliate e-commerce links.
- Developed secure REST APIs using Spring Boot and JWT for session management and role-based access control.
- Designed an optimized PostgreSQL schema to handle waste categories, pickup workflows, and reward transactions.

RotoGuard | *React, Spring Boot, WebSockets, PostgreSQL*

2026

- Developed an IoT-based real-time monitoring system to track machine health using simulated telemetry data (temperature, vibration).
- Implemented WebSocket-based communication in Spring Boot for continuous, low-latency streaming of live data to a React frontend.
- Built interactive React dashboards to visualize live machine status and track historical performance trends.

Experience / Extracurricular

Hackathon Participant

Kolkata, India

RotoGuard Development Team

2026

- Selected among the top 48 teams out of 200+ participants in a highly competitive technical hackathon.
- Spearheaded the design and backend development of the RotoGuard machine monitoring MVP under tight deadlines.

Education

Narula Institute of Technology

Kolkata, India

Bachelor of Technology in Information Technology

2023 – 2027

Saint Paul's School (CISCE)

Higher Secondary Education
